

# Impact of Trunk Orientation for Dynamic Bipedal Locomotion

**Dynamic Locomotion Group**

Özge Drama  
Alexander Spröwitz

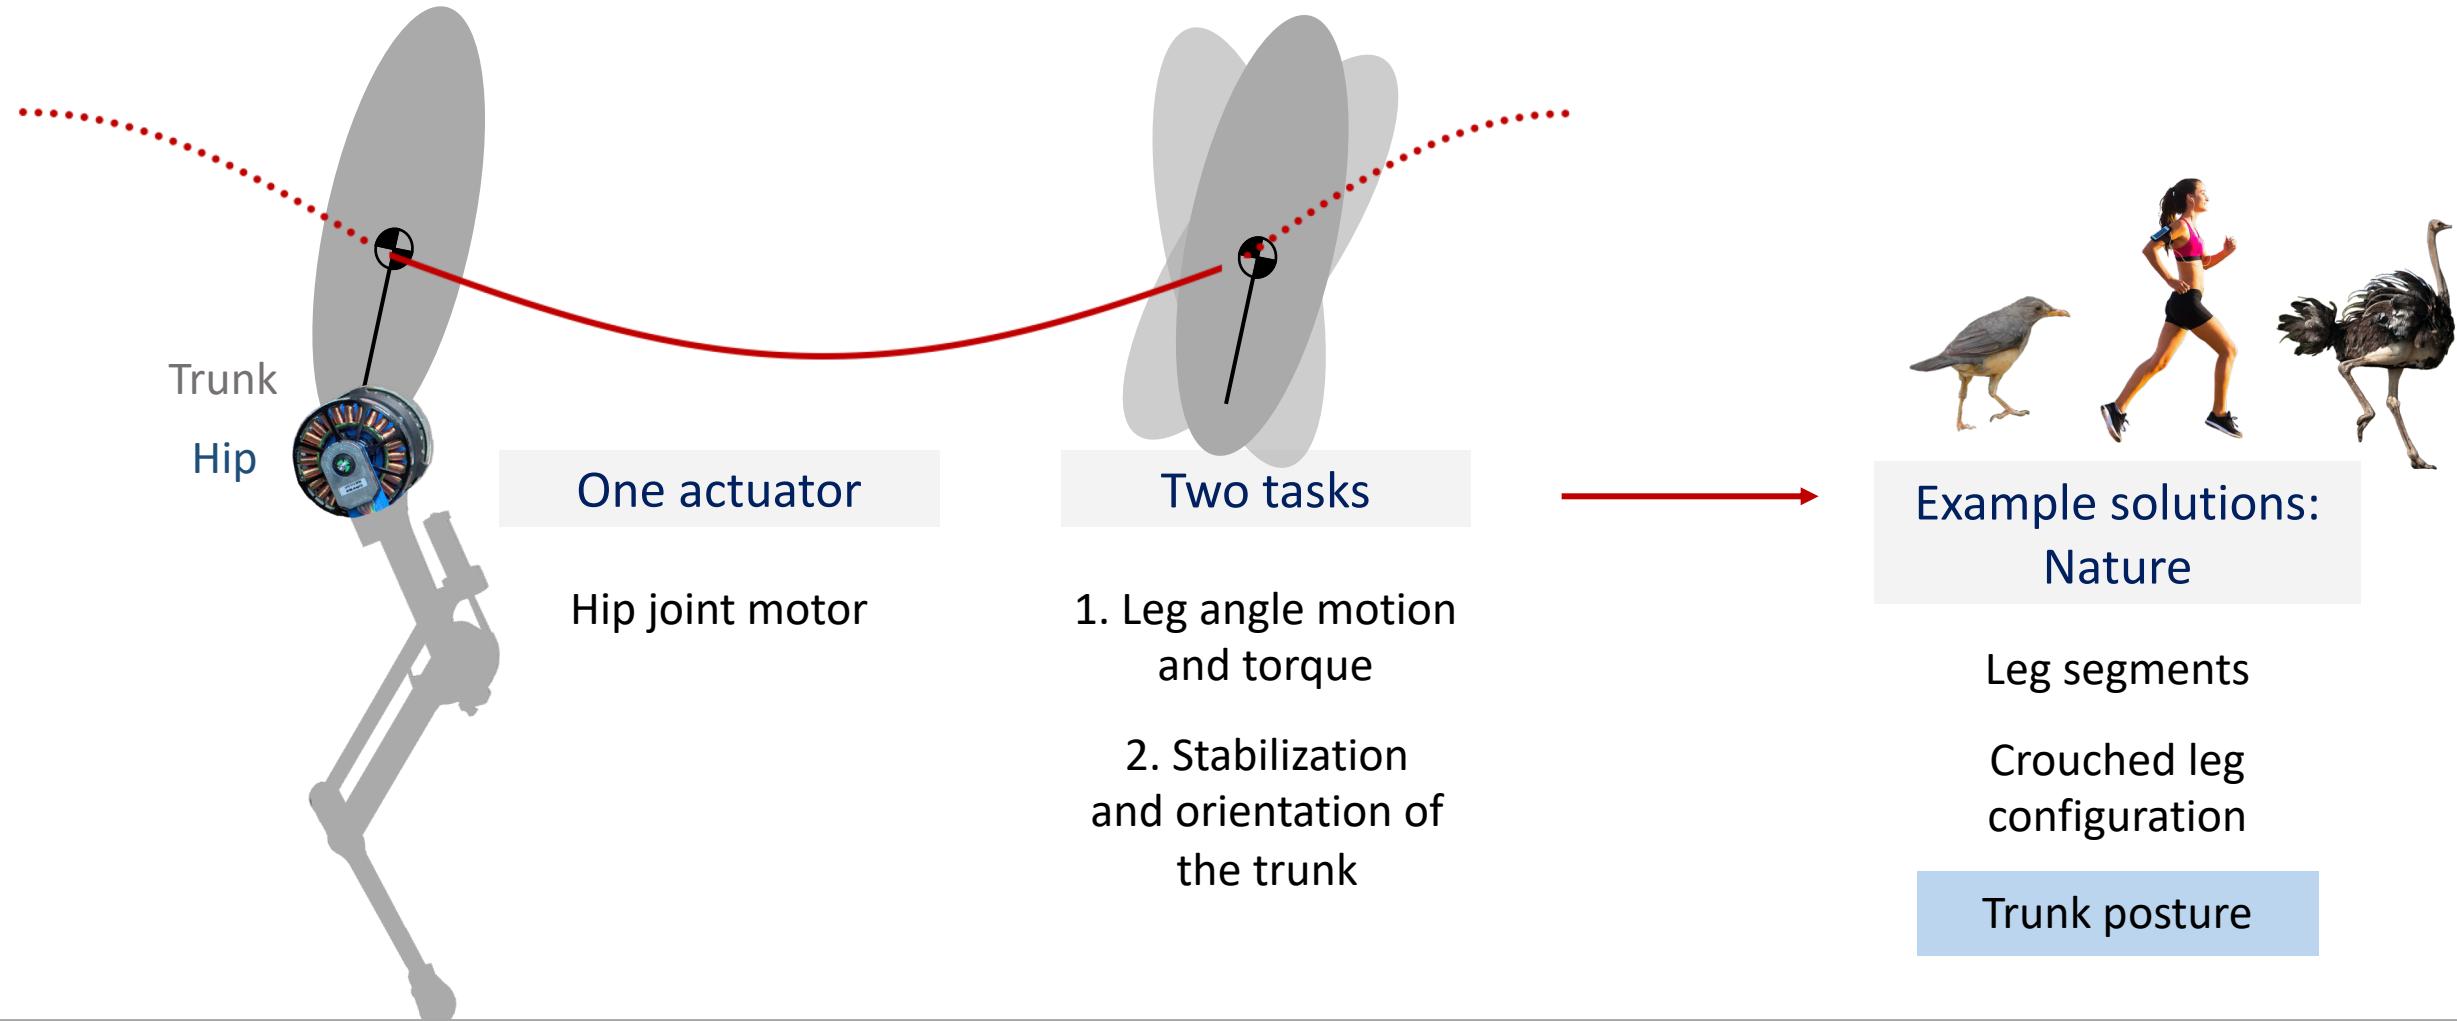

# Bipedalism

MAX-PLANCK-GESELLSCHAFT

imprs-is

# Morphologies

Bipedalism: Nature has provided various solutions

Orthograde

Humans

Out/Hex Runner

[Robotics Unlimited/IHMC]

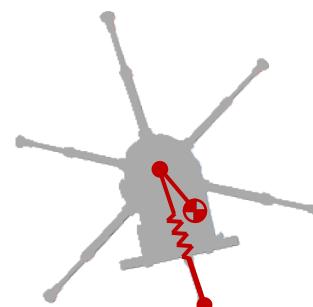

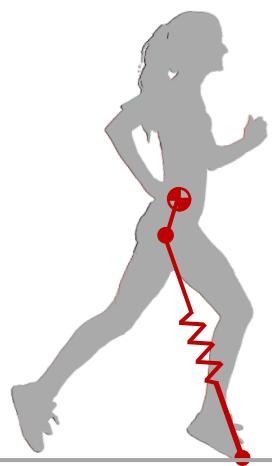

Pronograde

Birds/Ratides

Theropods

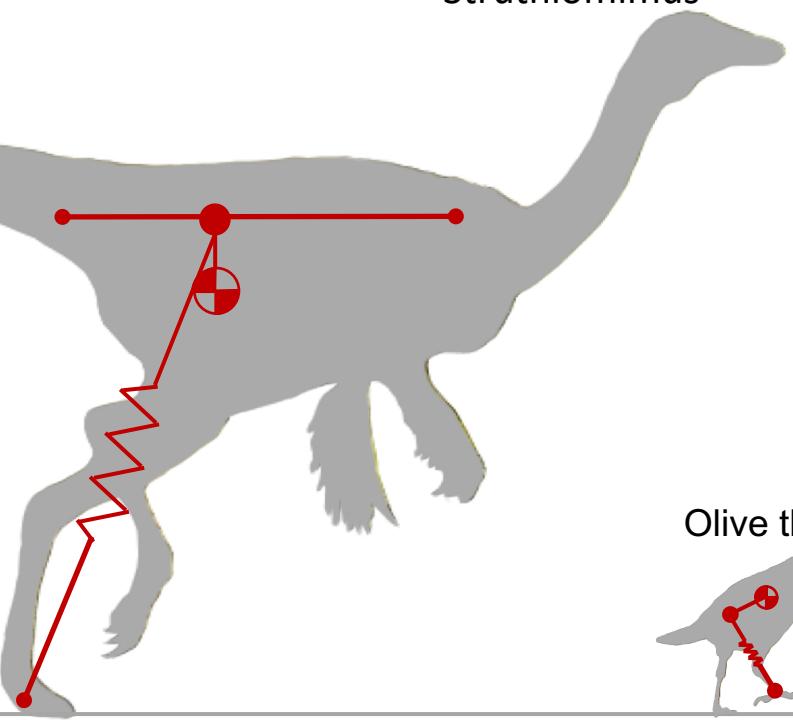

Struthiomimus

Struthio (Ostrich)

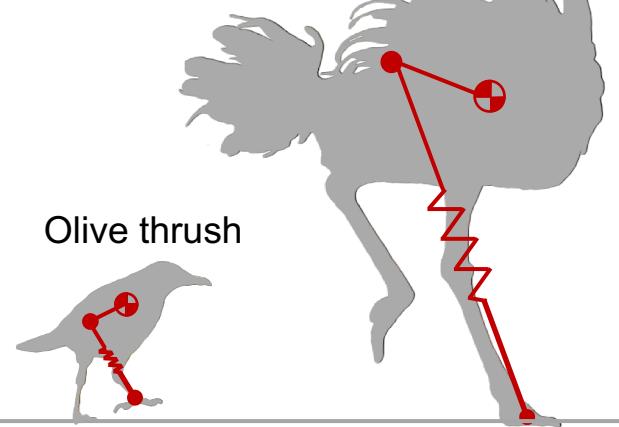

Bipedal Lizards

*Varanus panoptes*

Özge Drama

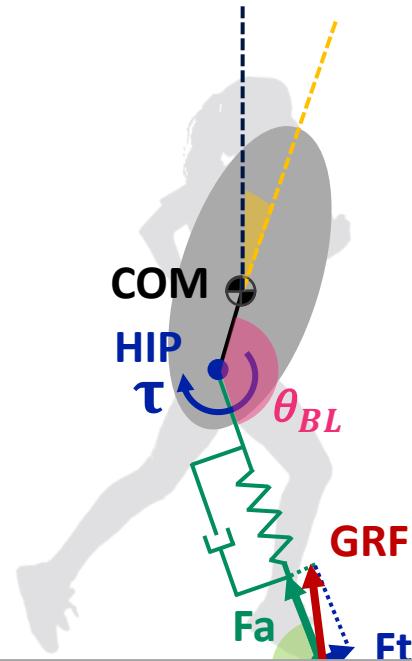

Olive thrush

# Model: T-SLIP

**T-SLIP** (Spring Loaded Inverted Pendulum Model with a Trunk) for Running

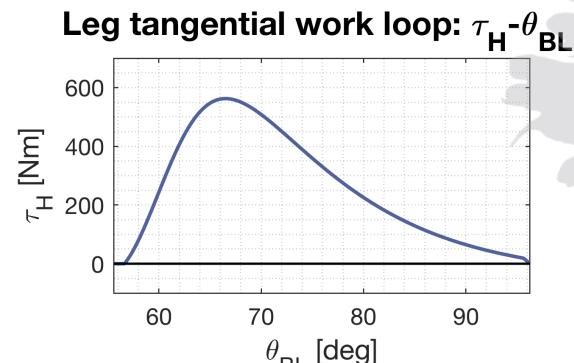

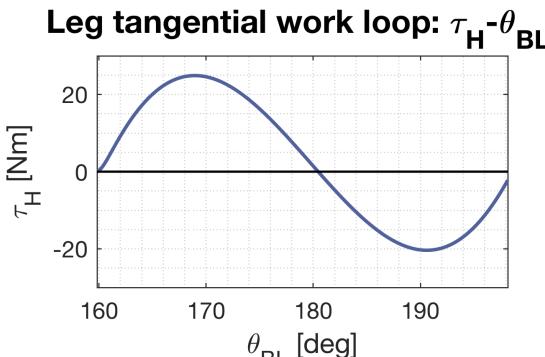

Human

- Goal: 1. Generate gaits with natural pitching oscillations  
 2. Investigate the function of **Leg -- Trunk – Control**

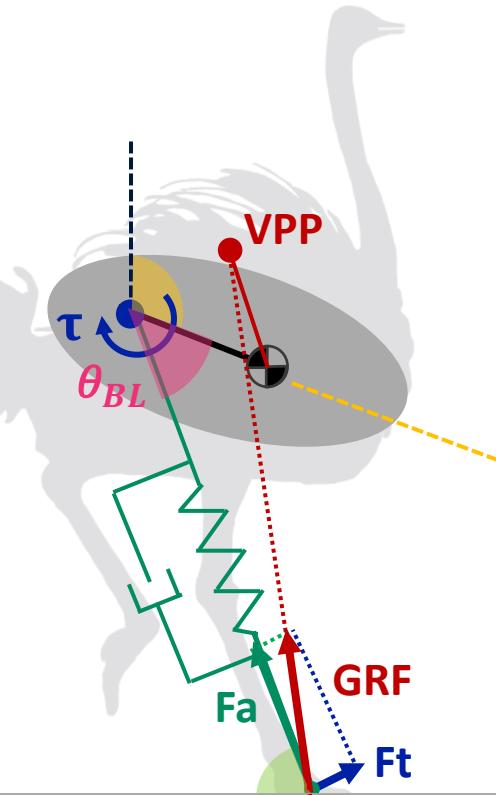

[Clemente 2017]

Means: 1. Bio-mechanical characteristics

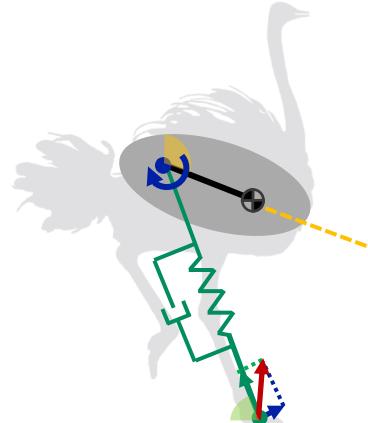

2. Robustness: Step down perturbations [Biewener, Daley 2007]  
 3. Control: PID and VPP concepts

Ratite

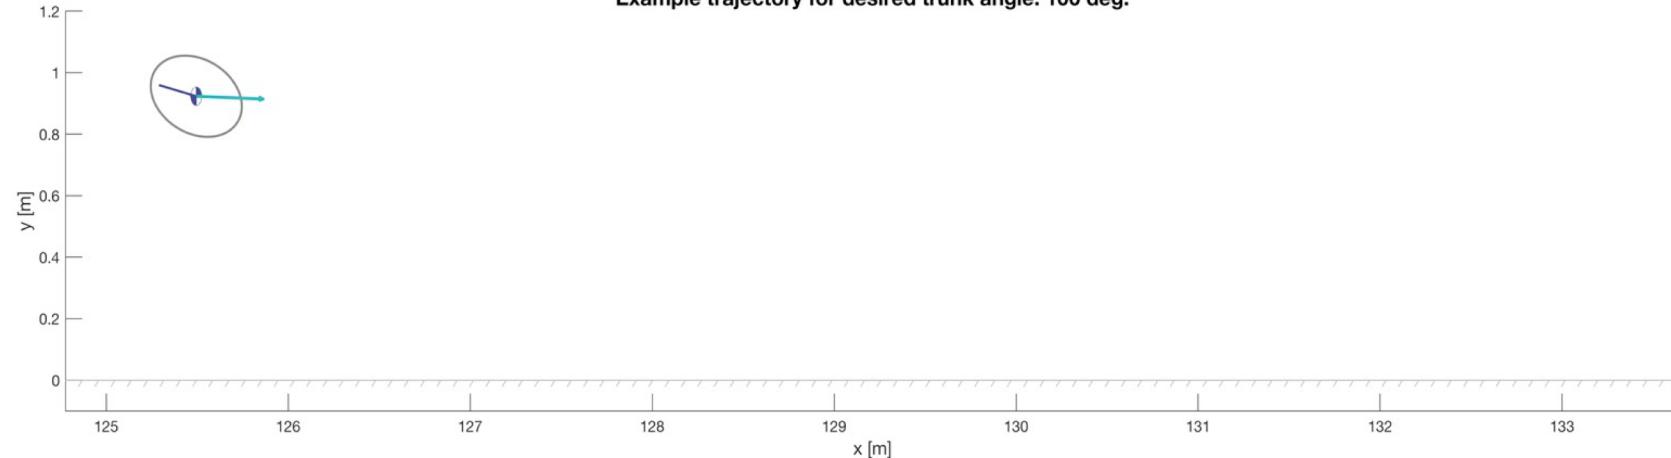

# Preliminary Results

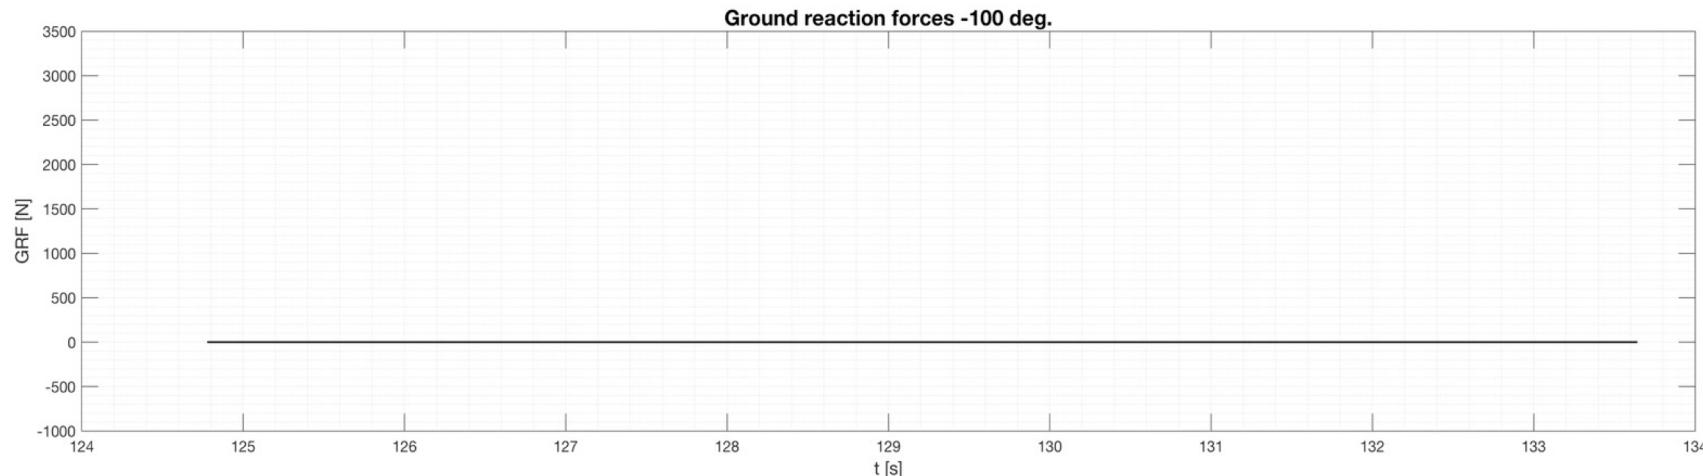

## Ratite Morphology

## 1.Gait Database

## 2.Starting biomechanical analysis

Thank You!
